

Fantastic Forest School

Our Year 2's fourth session was sadly the last for them, but they have had such a fantastic time over the past few weeks.

As always we started the session sat in the fire circle and one at a time we all had to remember a thing from our code of conduct and how to keep ourselves and everyone else safe.

It was really cold and windy today, so we wasted no time in starting our first task to get warmed up!

We had a couple of things to do today, so the first job was to go out and about and collect natural materials to make our natural mobiles and our Christmas pinecone creatures.

Once we had found what we wanted we went back to the circle and one by one we took a stick, 3 pieces of twine and tested our tying knot skills!

With a little help they were all ready for us to thread and tie our leaves, twigs, bark and anything else we had found. It was really tricky, but after persevering we were really pleased with our hard work and we were ready to tie on our handle.

Fantastic Forest School

With everything taken inside we were excited about making our Christmas pinecone creatures.

We crafted lots of robins and hedgehogs and talked all about our forest school adventures.

Our final session concluded with all of our children receiving a special certificate for being amazing adventurers.

We had all had a fantastic time during forest school and have learnt new skills and knowledge about our outdoor environment.

The children can't wait until they are in Year 3 so they can do it all again!

It was getting really cold, so we thought it was a good idea to have a play, followed by a cup of hot chocolate and a biscuit.

Because the wind was getting worse, we decided to complete our next task in the school hall so everything didn't blow away!
